About

A passionate full-stack developer with a knack for building scalable and user-friendly web applications. My journey into full-stack development began with a curiosity to understand how things work behind the scenes. I've honed my skills in front-end technologies like React, Angular, as well as back-end frameworks like Node.js and Express. What motivates me as a developer is the opportunity to tackle complex challenges and transform ideas into reality. I'm dedicated to delivering solutions that exceed expectations. I'm always eager to connect with fellow developers, designers, and innovators to exchange ideas and explore new opportunities.

Skills

- Front-End Technologies: Html, Css, Javascript, React js, Angular, Bootstrap, Typescript
- Backend Development: Node js, Express js, Mongo Db
- Dev Tools: Visual Studio, github
- DSA, Problem Solving
- REST Full Api
- Communication

Education

Srinivas University , Manglore	Sept 2020 – June 2023
• BCA(Software Development and Web Design)	
Luminar Technolab , Kochi	Sept 2023 – April 2024
• ME(A)RN Stack Development	

Projects

Media Player

- I developed a media player application using React, HTML, CSS, and JSON for managing media data. The player supports various media formats and offers a seamless user experience with features like categories and more. This project showcases my proficiency in front-end development and handling data dynamically with JSON.

Netflix Clone

- Developed a responsive Netflix clone using React, incorporating TMDB API for dynamic content. Employed CSS to replicate the Netflix interface, ensuring a cohesive and engaging user experience. Implemented principles for optimal viewing on various devices, enhancing the applications adaptability. Stacks used: React.js, TMDB API, Axios, Bootstrap.

Eazykart application

- EazyKart is an Angular based e commerce project showcasing my skills in frontend and backend development. Utilizing HTML, CSS, and Bootstrap, I created an intuitive and visually appealing user interface. The backend, powered by Node.js and Express, ensures seamless data management, with MongoDB handling the database. JavaScript and TypeScript were employed for frontend and backend integration, highlighting my proficiency in modern web technologies. ensuring smooth interactions.

Restaurent Application

- I built a restaurant static website using React, HTML, CSS, and Bootstrap, with Redux for state management. The site features a user-friendly interface where visitors can explore the menu and more. This project demonstrates my skills in front-end development, responsive design, and effective state management.
